

SleepWell

SleepWell AI: An Intelligent Sleep Quality Prediction and Personalized
Sleep Improvement System

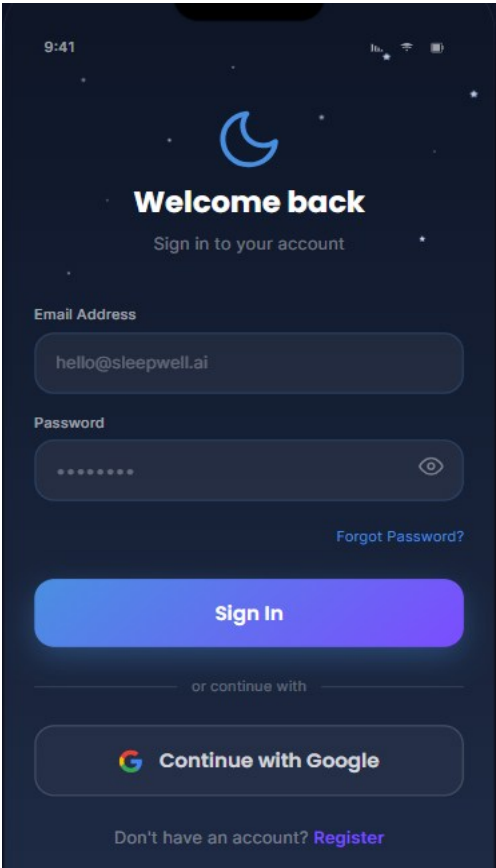

Onboarding Page Features:

Feature	Description
Welcome Illustration	Displays a sleep-themed illustration to visually introduce the application's purpose.
Onboarding Title	Displays the current onboarding message (e.g., "Improve Your Sleep").
Onboarding Description	Displays a brief explanation of the application's benefits (e.g., "Track, analyze, and optimize your sleep patterns with science-backed insights.").
Progress Indicator	Displays the user's current position within the onboarding sequence using pagination dots (e.g., Step 1 of 3).
Next Button	Navigates the user to the next onboarding screen.
Skip Button	Allows the user to skip the onboarding process and proceed directly to the authentication or home screen.
Background Theme	Displays the application's branded dark-themed interface with decorative elements for an engaging user experience.

Login Page Features

3. Login

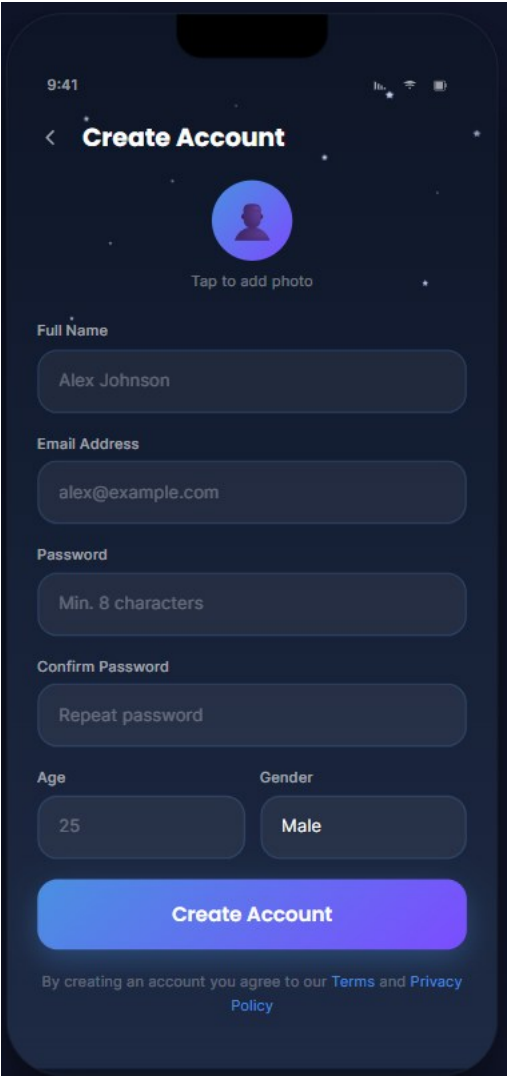

Components:

- Email Input
- Password Input
- Show/Hide Toggle
- Google Sign In Button
- Forgot Password Link
- Login Button

Feature	Description
App Logo	Displays the application's logo and brand identity.
Welcome Back Heading	Greets returning users and indicates they are on the login page.
Sign In Subtitle	Informs users that they need to sign in to access their account.
Email Address Field	Allows users to enter their registered email address.
Password Field	Allows users to enter their account password securely.
Show/Hide Password Icon	Toggles password visibility to help users verify their input.
Forgot Password? Link	Redirects users to the password recovery page to reset their password.
Sign In Button	Authenticates the entered credentials and logs the user into the application.
Continue with Google Button	Enables users to sign in quickly using their Google account.
Register Link	Directs new users to the account registration page if they do not already have an account.

UI Element	Font	Font Size	Background	Text Color	Button Style	Image/Icon	Type	Clickable

Create Account Page Features

4. Register

Components:

- Name Input
- Email Input
- Password + Confirm
- Age Picker
- Gender Picker
- Register Button

Feature	Description
Back Button	Returns the user to the previous screen or login page.
Create Account Title	Indicates that the page is used for new user registration.
Profile Photo Placeholder	Displays a default avatar and allows users to upload a profile picture.
Tap to Add Photo	Opens the device gallery or camera to select a profile image.
Full Name Field	Allows users to enter their full name.
Email Address Field	Allows users to enter a valid email address for account registration.
Password Field	Allows users to create a secure password (minimum of 8 characters).
Confirm Password Field	Requires users to re-enter the password to ensure accuracy.
Age Field	Allows users to enter their age.
Gender Field	Allows users to select their gender from the available options.
Create Account Button	Validates the entered information and creates a new user account.
Terms and Privacy Policy Notice	Informs users that creating an account means they agree to the application's Terms of Service and Privacy Policy.

Home Dashboard Page Features

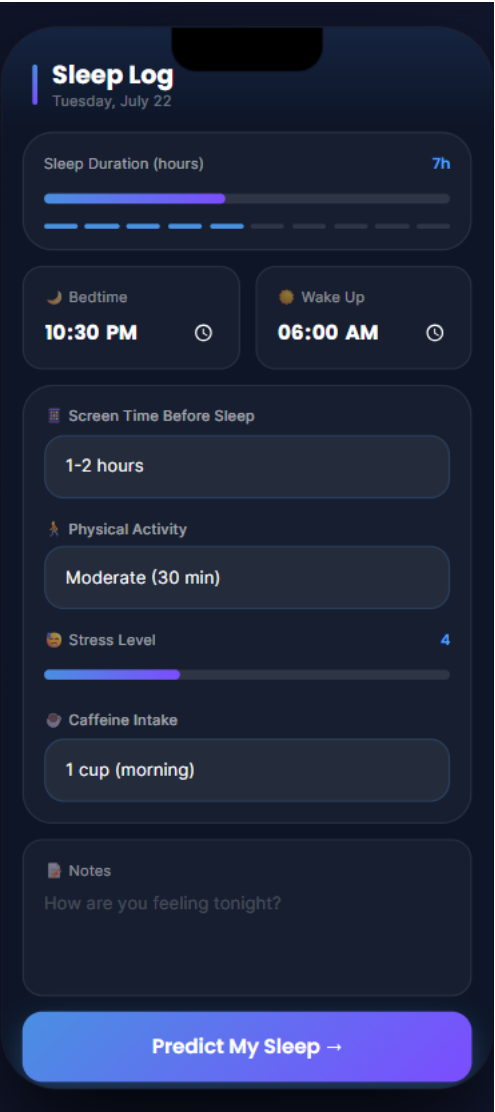

5. Home Dashboard

- Components:**
- Circular Score Ring
 - AI Prediction Card
 - 5 Quick Stats
 - Mini Trend Chart
 - Tips Section
 - Bottom Nav Bar

Feature	Description
Greeting Section	Displays a personalized greeting based on the time of day along with the user's name.
Notification Button	Allows users to view notifications, reminders, and alerts related to sleep tracking or the application.
Profile Button	Opens the user's profile where personal information and account settings can be managed.
Today's Sleep Score	Displays the user's current sleep score (e.g., 82/100) along with a quality rating such as Excellent.
Sleep Score Improvement Indicator	Shows the change in sleep score compared to the previous night (e.g., +7 points vs last night).
AI Prediction Card	Displays an AI-generated prediction of the expected sleep quality for the upcoming night.
Prediction Confidence	Indicates the confidence level of the AI prediction (e.g., 94% Confidence).
Sleep Forecast	Provides a brief prediction such as Excellent Sleep Expected with an option to view detailed analysis.
Quick Stats Section	Displays a summary of today's important sleep-related metrics.
Sleep Duration	Shows the total amount of sleep recorded (e.g., 7.5 hours).
Stress Level	Displays the user's current stress level or stress score.
Screen Time	Shows the total screen usage duration before sleep (e.g., 1.2 hours).
Caffeine Intake	Displays the number of caffeinated drinks consumed (e.g., 1 cup).
Daily Activity	Shows the number of steps or physical activity completed during the day (e.g., 8,420 steps).
7-Day Trend Graph	Displays a graphical overview of the user's sleep score or sleep quality over the past seven days.
View All (Trend)	Opens a detailed report containing historical sleep trends and analytics.
Today's Tips	Displays personalized recommendations to improve sleep quality (e.g., Sleep 30 minutes earlier).
See All (Tips)	Opens the complete list of personalized sleep improvement recommendations.

Sleep Log Page Features

6. Sleep Log

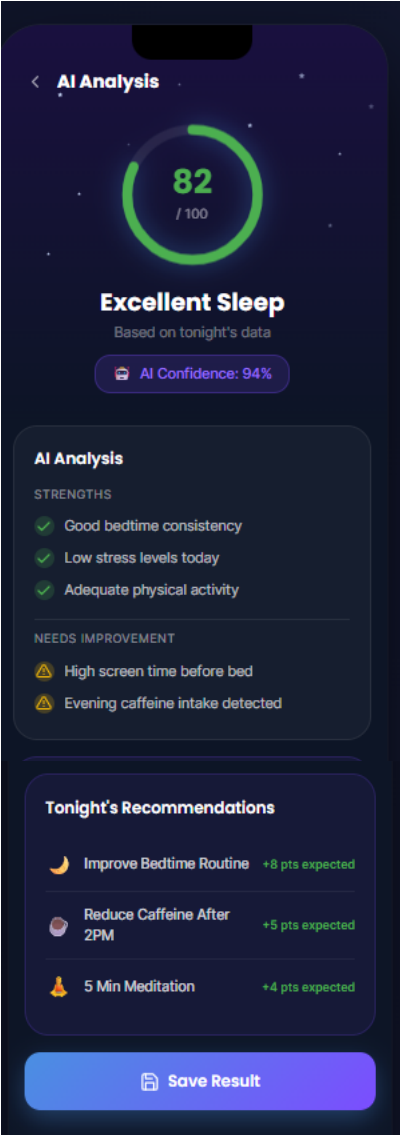

Components:

- Duration Slider + Visual Bar
- Bedtime Picker
- Wake Time Picker
- Quality Dropdown
- Stress Slider
- Notes Input
- Save Button

Feature	Description
Sleep Log Title	Indicates that the page is used to record and review the user's daily sleep information.
Date Display	Shows the selected date for the sleep log entry (e.g., Tuesday, July 22).
Sleep Duration	Displays the total number of hours slept (e.g., 7 hours) along with a visual progress bar.
Sleep Duration Progress Bar	Provides a graphical representation of the user's sleep duration compared to the recommended sleep goal.
Bedtime Field	Displays or allows the user to select the time they went to bed (e.g., 10:30 PM).
Wake-Up Time Field	Displays or allows the user to select the time they woke up (e.g., 06:00 AM).
Screen Time Before Sleep	Allows users to record the amount of screen usage before bedtime (e.g., 1–2 hours).
Physical Activity Field	Allows users to record their daily physical activity level and duration (e.g., Moderate (30 min)).
Stress Level	Displays or allows users to select their stress level using a numeric scale and visual indicator (e.g., 4).
Caffeine Intake Field	Allows users to record the amount and timing of caffeine consumed (e.g., 1 cup (morning)).
Notes Section	Allows users to enter personal notes about how they are feeling or any factors that may affect their sleep.
Predict My Sleep Button	Submits the entered sleep-related information to generate an AI-based sleep quality prediction and recommendations.

AI Analysis Page Features

7. AI Prediction

Components:

- Large Score Ring
- Strengths List + Icons
- Improvements List + Icons
- Recommendations
- Point Gains Badge

Feature	Description
AI Analysis Title	Indicates that the page provides an AI-generated analysis of the user's sleep quality based on the recorded sleep data.
Sleep Score	Displays the user's overall sleep quality score (e.g., 82/100) generated by the AI model.
Sleep Score Indicator	Provides a circular progress indicator that visually represents the user's sleep score.
Sleep Quality Status	Displays the AI's overall assessment of the user's sleep quality (e.g., Excellent Sleep).
Analysis Basis	Indicates that the sleep analysis is generated using the user's sleep data collected for the current night.
AI Confidence Level	Displays the confidence percentage of the AI prediction (e.g., 94%), indicating how reliable the generated analysis is.
Strengths Section	Highlights positive sleep-related behaviors detected from the user's data, such as consistent bedtime, low stress levels, and adequate physical activity.
Needs Improvement Section	Identifies habits that may negatively affect sleep quality, such as excessive screen time before bed and late caffeine intake.
Tonight's Recommendations	Displays personalized AI-generated recommendations to improve future sleep quality.
Expected Improvement	Shows the estimated increase in sleep score that each recommendation may contribute (e.g., +8 pts expected).
Recommendation Items	Provides actionable suggestions such as improving bedtime routine, reducing caffeine intake after 2 PM, and practicing a short meditation before sleep.
Save Result Button	Allows users to save the AI analysis results and recommendations for future review and historical tracking.

Analytics Page Features

8. Analytics

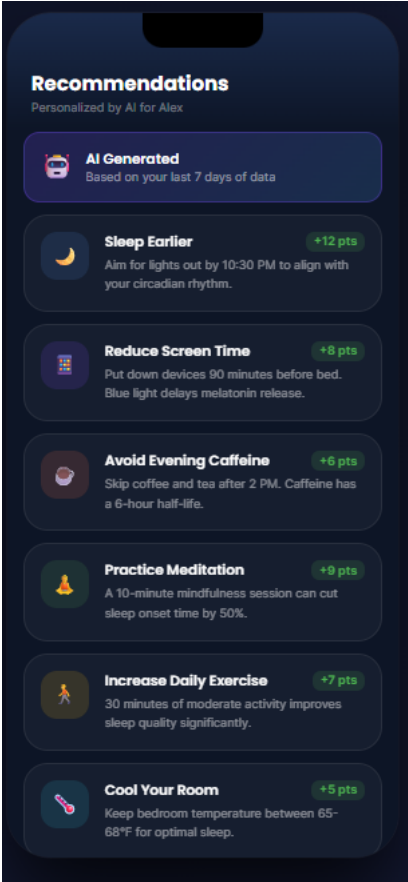

Components:

- Week/Month Toggle
- Area Chart
- Bar Chart
- Duration Sub-chart
- Stress Sub-chart
- 6 Stat Cards

Feature	Description
Analytics Title	Indicates that the page provides analytical insights into the user's sleep patterns and overall sleep performance.
Subtitle	Displays a brief description informing users that the page contains their sleep insights.
Time Period Selector	Allows users to switch between different analysis periods (e.g., This Week and This Month) to view sleep trends over time.
Sleep Score Chart	Displays a bar chart showing the user's sleep score progression across the selected time period (e.g., Week 1–Week 4).
Duration Chart	Displays a bar chart illustrating average sleep duration (in hours) for each day within the selected period.
Stress Level Chart	Displays a line graph showing daily stress levels, allowing users to observe fluctuations over time.
Average Sleep Card	Displays the user's average sleep duration for the selected period (e.g., 7.3 hours).
Best Day Card	Highlights the day with the highest sleep quality or sleep score (e.g., Saturday).
Worst Day Card	Identifies the day with the lowest sleep quality or sleep score (e.g., Friday).
Average Stress Card	Displays the user's average stress level calculated from the recorded sleep logs (e.g., 4.3).
Average Sleep Score Card	Displays the average AI-generated sleep score for the selected period (e.g., 75).
Sleep Streak Card	Displays the number of consecutive days the user has consistently recorded sleep data (e.g., 7-day streak).
Bottom Navigation Bar	Provides navigation to the main sections of the application, including Home, Sleep Log, Analytics, and Profile.

Recommendations Page Features

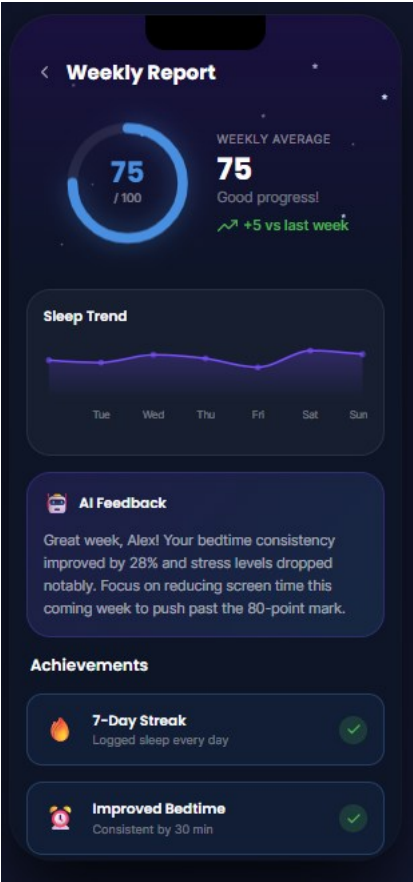

9. Recommendations

- Components:
- 7 AI Cards
 - Card Icon
 - Card Title
 - Card Description
 - Expected Improvement Badge

Feature	Description
Recommendations Title	Indicates that the page provides personalized AI-generated recommendations to improve the user's sleep habits and overall wellness.
Personalized Subtitle	Displays a message indicating that the recommendations are personalized for the logged-in user (e.g., "Personalized by AI for Alex").
AI Generated Banner	Highlights that all recommendations are generated by AI based on the user's recent sleep data (e.g., the last 7 days).
Recommendation Cards	Displays a list of personalized recommendations designed to improve sleep quality and healthy habits.
Sleep Earlier Recommendation	Suggests going to bed earlier (e.g., by 10:30 PM) to better align with the user's circadian rhythm.
Reduce Screen Time Recommendation	Advises limiting device usage before bedtime (e.g., avoid screens 90 minutes before sleep) to improve melatonin production.
Avoid Evening Caffeine Recommendation	Recommends avoiding coffee or tea after a specified time (e.g., after 2 PM) to minimize caffeine's effect on sleep.
Practice Meditation Recommendation	Encourages a short meditation session before bedtime to reduce sleep onset time and improve relaxation.
Increase Daily Exercise Recommendation	Suggests engaging in moderate daily physical activity (e.g., 30 minutes) to improve sleep quality.
Cool Your Room Recommendation	Recommends maintaining an optimal bedroom temperature (e.g., 65°–68°F) for better sleep quality.
Reward Points Badge	Displays the number of wellness points that the user can earn by completing each recommendation (e.g., +12 pts, +8 pts).
Recommendation Icon	Displays a visual icon representing the category of each recommendation (sleep, screen time, caffeine, meditation, exercise, temperature).
Scrollable Recommendations List	Allows users to scroll through all available personalized recommendations when the list exceeds the screen height.

Weekly Report Page Features

10. Weekly Progress

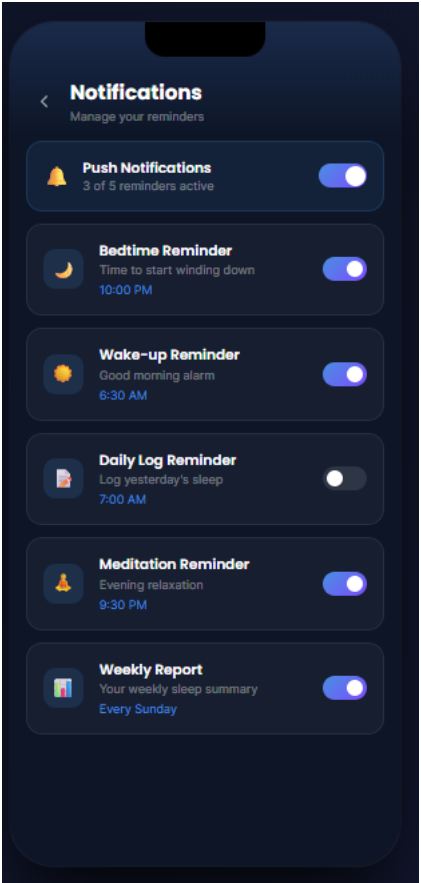

Components:

- Progress Circle
- Trend Graph
- AI Feedback Card
- 5 Achievements
- Earn State Indicators

Feature	Description
Weekly Report Title	Indicates that the page provides a summary of the user's sleep performance and progress for the current week.
Back Button	Allows the user to return to the previous screen.
Weekly Average Score Gauge	Displays the user's overall weekly sleep score using a circular progress indicator (e.g., 75/100).
Score Value	Shows the numerical weekly sleep score achieved during the selected week.
Weekly Average Summary	Displays the average sleep score for the week along with a short motivational message (e.g., "Good progress!").
Weekly Progress Indicator	Shows the change in sleep performance compared to the previous week (e.g., +5 vs last week).
Sleep Trend Chart	Displays a line graph illustrating the user's daily sleep score or sleep quality trend across the week (Tuesday–Sunday).
AI Feedback Card	Provides AI-generated feedback summarizing the user's weekly sleep improvements, strengths, and areas for further improvement.
Achievements Section	Displays milestones and accomplishments earned during the week based on the user's sleep habits.
7-Day Streak Achievement	Indicates that the user has successfully logged sleep every day for seven consecutive days.
Improved Bedtime Achievement	Recognizes that the user maintained a more consistent bedtime (e.g., within a 30-minute window).
Achievement Status Icon	Displays a completion indicator (e.g., checkmark) showing that an achievement has been successfully earned.
Scrollable Content	Allows users to scroll through the report if additional charts, feedback, or achievements are available.

Notifications Page Features

11. Notifications

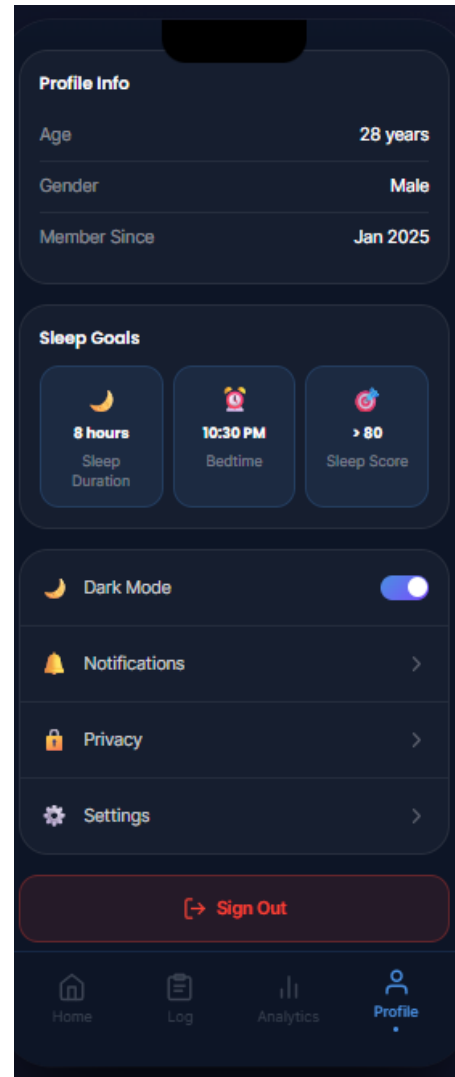

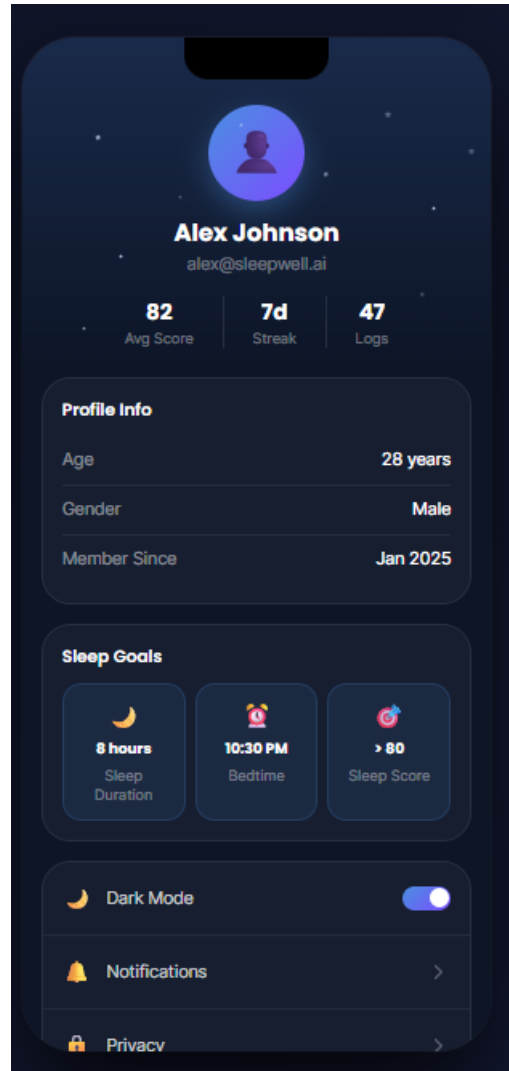

Components:

- 5 Reminder Toggles
- Toggle Switches
- Animated Thumb
- Reminder Labels
- Time Settings

Feature	Description
Notifications Title	Indicates that the page allows users to manage application notifications and reminders.
Subtitle	Displays a brief description informing users that they can manage their reminders and notification preferences.
Back Button	Allows the user to return to the previous screen.
Push Notifications Toggle	Enables or disables all push notifications for the application. It also displays the number of currently active reminders (e.g., "3 of 5 reminders active").
Bedtime Reminder	Allows users to enable or disable bedtime reminders. Displays the scheduled reminder time (e.g., 10:00 PM).
Wake-up Reminder	Allows users to enable or disable wake-up reminders. Displays the scheduled alarm time (e.g., 6:30 AM).
Daily Log Reminder	Allows users to enable or disable reminders to log their previous night's sleep. Displays the scheduled reminder time (e.g., 7:00 AM).
Meditation Reminder	Allows users to enable or disable reminders for evening meditation sessions. Displays the scheduled reminder time (e.g., 9:30 PM).
Weekly Report Reminder	Allows users to enable or disable notifications for receiving their weekly sleep summary. Displays the scheduled delivery day (e.g., Every Sunday).
Reminder Icon	Displays an icon representing each notification category, such as bedtime, wake-up, sleep log, meditation, or weekly report.
Individual Toggle Switches	Allows users to independently enable or disable each reminder without affecting other notification settings.
Scrollable Notification List	Allows users to scroll through all notification settings if additional reminders are available.

Profile Page Features

12. Profile

Components:

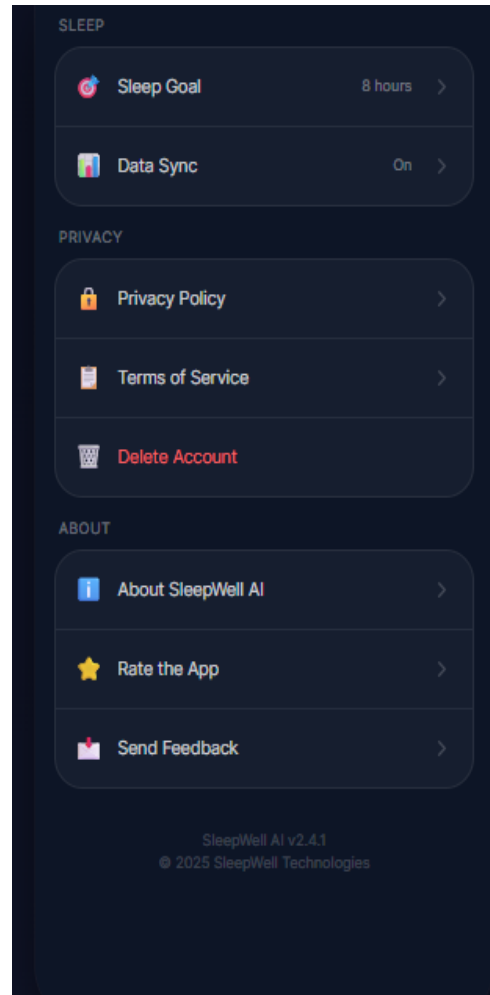

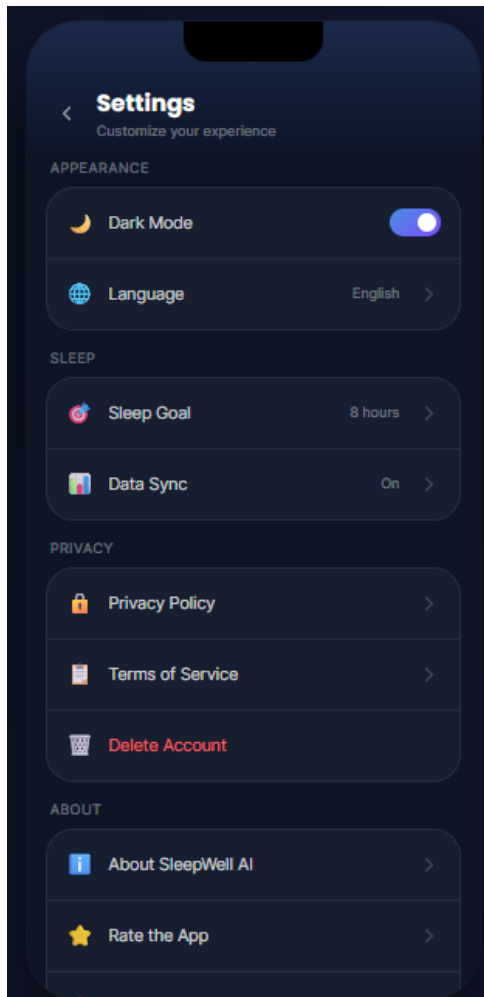

- Avatar
- Stats Row
- Goals Grid
- Settings Links
- Toggles

Profile Page Features

Feature	Description
Profile Header	Displays the user's profile picture, full name, and registered email address.
Profile Avatar	Displays the user's profile image or a default avatar if no custom image has been uploaded.
Average Sleep Score	Displays the user's overall average sleep score (e.g., 82).
Sleep Streak	Displays the number of consecutive days the user has achieved their sleep goals (e.g., 7 days).
Sleep Logs	Displays the total number of recorded sleep logs (e.g., 47 Logs).
Profile Information Section	Displays the user's personal profile details.
Age	Displays the user's age (e.g., 28 years).
Gender	Displays the user's selected gender (e.g., Male).
Member Since	Displays the month and year the user joined the application (e.g., Jan 2025).
Sleep Goals Section	Displays the user's configured sleep-related goals and targets.
Sleep Duration Goal	Displays the user's target nightly sleep duration (e.g., 8 hours).
Bedtime Goal	Displays the user's preferred bedtime (e.g., 10:30 PM).
Target Sleep Score	Displays the user's desired sleep score goal (e.g., > 80).
Dark Mode Toggle	Allows the user to enable or disable dark mode for the application interface.
Notifications Menu	Navigates the user to the Notifications settings page to manage reminders and alerts.
Privacy Menu	Navigates the user to the Privacy page to manage privacy preferences and account security settings.
Settings Menu	Navigates the user to the application's general settings page.
Sign Out Button	Allows the user to securely log out of their account.
Bottom Navigation Bar	Allows users to navigate between Home, Log, Analytics, and Profile pages.
Active Navigation Indicator	Highlights the currently selected Profile tab in the bottom navigation bar.

Settings Page Features

13. Settings

Components:

- Appearance Section
- Sleep Section
- Privacy Section
- About Section
- Toggles
- Nav Arrows

Settings Page Features

Feature	Description
Settings Header	Displays the page title Settings with the subtitle "Customize your experience."
Back Button	Allows the user to return to the previous screen.
Dark Mode Toggle	Allows the user to enable or disable Dark Mode for the application interface.
Language Setting	Displays the currently selected application language (e.g., English) and allows the user to change it.
Sleep Goal	Displays the user's configured sleep duration goal (e.g., 8 hours) and navigates to the Sleep Goal configuration page.
Data Sync	Displays the current synchronization status (e.g., On) and allows the user to manage or synchronize application data.
Privacy Policy	Navigates the user to the application's Privacy Policy page.
Terms of Service	Navigates the user to the application's Terms of Service page.
Delete Account	Allows the user to permanently delete their account after confirmation.
About SleepWell AI	Displays information about the application, including version details and developer information.
Rate the App	Allows the user to submit a rating for the application through the device's app store.
Send Feedback	Allows the user to submit feedback, suggestions, or report issues to the development team.
Application Version	Displays the current application version (e.g., v2.4.1).
Copyright Information	Displays the application's copyright information (e.g., © 2026 SleepWell Technologies).
